

LASER DECAL INSTALLATION INSTRUCTIONS

Please note the following instructions for installation of the laser decal on your vehicle.

The decal **MUST** be installed on the driver's side (or left side) of your vehicle. The best location for the decal is the passenger window behind the driver. If you have an SUV or a van, and have a rear side window or third window on the left hand side of your vehicle, you can place the decal there as well. **THE DECALS WILL NOT WORK IF THEY ARE INSTALLED ON THE FRONT WINDSHIELD, REAR WINDOW OR RIGHT SIDE OF YOUR VEHICLE.**

Please note that when installing the decal, it must be on the outside of your vehicle and at least four (4) inches away from the window molding. If you are not sure how to install the decal, please contact management at (949) 838-3277 for assistance.
